Training Delivery Options

Standard Technical Training

In-Person Training will be delivered on campus with instructor-led sessions full-time Monday through Friday for the duration of the training. This is typically 30 hours per week of class time. Training is in-person unless otherwise stated.

Blended (In Person/Remote) Training will be delivered both in-person (on campus) and remote (online) with instructor led sessions full-time Monday through Friday for the duration of the training. Training is blended and therefore, course material will be delivered through the training provider's Brightspace Learning Management System and will incorporate other digital learning tools (e.g. Microsoft Teams), and some in-person learning on campus. Dates for in-person (on campus) technical training will be provided by the instructor. All Students are required to attend the on-campus portion.

Dual-Delivery will be instructor led full-time delivery Monday through Friday for the duration of the training. Apprentices can choose to be in-person (on campus) or join remotely. This is typically 30 hours per week of class time. If an apprentice chooses to join remotely the training materials are delivered through the training provider's Brightspace Learning Management System and will incorporate remote (online) meeting tools (e.g. Microsoft Teams). All apprentices (in person and remote) must attend on campus practical components (if required).

Online Technical Training

Remote (Instructor Led) will be delivered full-time remotely via instructor-led sessions Monday through Friday. Training materials are delivered through the training provider's Brightspace Learning Management System and will incorporate remote (online) meeting tools (e.g. Microsoft Teams). There is no in-person (on campus) component.

Online Cohort (Self-Paced) is primarily self-paced training. However, weekly sessions with an instructor will be scheduled to support your success. The schedule of those sessions will be provided by your instructor. Training is delivered on the training provider's Brightspace Learning Management System and will incorporate other digital learning tools (e.g. Microsoft Teams). Start and completion dates are indicated in the schedule below. (Typically, 40 weeks) This would make the apprentice ineligible for EI as it would be considered as a part-time training delivery option.

Online Cohort (Self-Paced) Accelerated is primarily self-paced training. However, weekly sessions with an instructor will be scheduled to support your success. The schedule of those sessions will be provided by your instructor. Training is delivered in the training provider's Brightspace Learning Management System and will incorporate other digital learning tools (e.g. Microsoft Teams), Just over a shorter period. Start and completion dates are indicated in the schedule below. (Typically, 24

weeks) This would make the apprentice ineligible for EI as it would be considered as a part-time training delivery option.

Online Self-directed Training will be delivered through the Nova Scotia Apprenticeship Learning Management System. It is accessible, self-paced technical training where apprentices use this platform to complete components of their apprenticeship programs in a flexible and user-friendly environment. While a system support person will be available to address technical issues, there is not an instructor attached to the learning and trade-based questions an apprentice may have should be directed to their Journeyperson/Mentor.

Distributed Technical Training

Distributed technical training is delivered in-person at one location (hub) and virtually to students at one or multiple locations (spokes).

Hub: The central training location. The hub will have a primary instructor who will be assessing, evaluating, and teaching all theoretical components to both hub and spoke students. The hub instructor will be planning, demonstrating, and evaluating all practical learning objectives for the hub location.

Spoke: An auxiliary training location branching from the hub location. The spoke may have an auxiliary instructor who will be planning, demonstrating, and evaluating all practical learning objectives for the spoke location. Theoretical learning will be provided by the hub instructor via technology connecting all students from spokes to the hub. Students are not permitted to attend remotely. Students will be required to attend class at the spoke.

Hybrid Technical Training

Apprentices will spend two, 8-hour days in accelerated technical training then remain 3 days on their jobsite per week. This would make the apprentice ineligible for EI as it would be considered as a part-time training delivery option. Employers would continue to pay the apprentice while in technical training and may be able to apply for grants to cover the wages lost.

Part - Time Training

An altered delivery option that offers fewer weekly hours than full-time studies, therefore extending the length of the level. Part-time study may occur during daytime, evenings, or weekends.

Gap-Week

A transitional week to cover material apprentices may have otherwise missed when moving to an updated version of curriculum.

What is the attendance policy?

Promptness and regular attendance are expected from all apprentices attending technical training to ensure success. Following an extended absence, the Nova Scotia Apprenticeship Agency and the training provider reserves the right to communicate absenteeism by the apprentice to employers, Service Canada, or third-party partners.

Apprentices must attend 90% of the total technical training hours per level. Training providers will track attendance during technical training and attendance will be confirmed at the start and midway through the day for all instructor-led delivery types (including all full-time and part-time deliveries, remote delivery included). Attendance will be reported to NSAA regularly.

Once 10% of class time is missed, you will be removed from training and will be required to repeat the full level of training.

How do I apply for technical training?

PLEASE NOTE: Enrollment in Technical Training is available for up to 30 days prior to the start of training. There will be no admissions after that date.

To register for training, make sure you are a registered apprentice. For more information on how to register as an apprentice, click here.

To enroll in training, please log into AMS. Please note, to be eligible to enroll in training, your hours must be updated, and you have to meet the minimum hour requirements. These requirements are as follows:

Level 1 – 900
Level 2 – 2700
Level 3 – 4500
Level 4 - 6300

If you have concerns regarding your hours or eligibility for training, please contact your ITC.

Can I take two levels of training in one training year?

The Nova Scotia Apprenticeship Agency periodically updates our training based on input from industry and our Atlantic harmonization efforts. We recommend that before you enroll in two levels of training in one year, you contact your Industry Training Consultant to ensure that you do not repeat any material or experience training gaps.

If you don't know which training you should register for, please contact the Agency.
