# Training Delivery Options

## Standard Technical Training

**In-Person Training** will be delivered on campus with instructor-led sessions full-time Monday through Friday for the duration of the training. This is typically 30 hours per week of class time. Training is in-person unless otherwise stated.

**Blended (In Person/Remote)** Training will be delivered both in-person (on campus) and remote (online) with instructor led sessions full-time Monday through Friday for the duration of the training. Training is blended and therefore, course material will be delivered through the training provider's Brightspace Learning Management System and will incorporate other digital learning tools (e.g. Microsoft Teams), and some in-person learning on campus. Dates for in-person (on campus) technical training will be provided by the instructor.

**Dual-Delivery** will be instructor led full-time delivery Monday through Friday for the duration of the training. Apprentices can choose to be in-person (on campus) or join remotely. This is typically 30 hours per week of class time. If an apprentice chooses to join remotely the training materials are delivered through the training provider's Brightspace Learning Management System and will incorporate remote (online) meeting tools (e.g. Microsoft Teams).

## Online Technical Training

**Remote (Instructor Led)** will be delivered full-time remotely via instructor-led sessions Monday through Friday. Training materials are delivered through the training provider's Brightspace Learning Management System and will incorporate remote (online) meeting tools (e.g. Microsoft Teams). There is no in-person (on campus) component.

**Online Cohort (Self-Paced)** is primarily self-paced training. However, weekly sessions with an instructor will be scheduled to support your success. The schedule of those sessions will be provided by your instructor. Training is delivered on the training provider's Brightspace Learning Management System and will incorporate other digital learning tools (e.g. Microsoft Teams). Start and completion dates are indicated in the schedule below. (Typically, 40 weeks) This would make the apprentice ineligible for EI as it would be considered as a part-time training delivery option.

**Online Cohort (Self-Paced) Accelerated** is primarily self-paced training. However, weekly sessions with an instructor will be scheduled to support your success. The schedule of those sessions will be provided by your instructor. Training is delivered in the training provider's Brightspace Learning Management System and will incorporate other digital learning tools (e.g. Microsoft Teams), Just over a shorter period. Start and completion dates are indicated in the schedule below. (Typically, 24 weeks) This would make the apprentice ineligible for EI as it would be considered as a part-time training delivery option.

**Online Self-directed Training** will be delivered through the Nova Scotia Apprenticeship Learning Management System. It is accessible, self-paced technical training where apprentices use this platform to complete components of their apprenticeship programs in a flexible and user-friendly environment. While a system support person will be available to address technical issues, there is not an instructor attached to the learning and trade-based questions an apprentice may have should be directed to their Journeyperson/Mentor.

### **Distributed Technical Training**

Distributed technical training is delivered in-person at one location (hub) and virtually to students at one or multiple locations (spokes).

**Hub:** The central training location. The hub will have a primary instructor who will be assessing, evaluating, and teaching all theoretical components to both hub and spoke students. The hub instructor will be planning, demonstrating, and evaluating all practical learning objectives for the hub location.

**Spoke:** An auxiliary training location branching from the hub location. The spoke may have an auxiliary instructor who will be planning, demonstrating, and evaluating all practical learning objectives for the spoke location. Theoretical learning will be provided by the hub instructor via technology connecting all students from spokes to the hub.

### **Upfront Level 1 Technical Training (For Pre-Apprentices)**

**Upfront Level 1** will prepare pre-apprentices to be job-ready by completing Level 1 technical training in advance and then being matched to an employer once classroom training is complete. This initiative provides additional financial, social, learning and employment supports for pre-apprentices requiring help to be successful starting their apprenticeship journey. This program removes barriers to gainful employment and can be administered with local partners. This is typically 30-40 hours per week of class time. Training is typically in-person.

### **Hybrid Technical Training**

Apprentices will spend two, 8-hour days in accelerated technical training then remain 3 days on their jobsite per week. This would make the apprentice ineligible for EI as it would be considered as a part-time training delivery option. Employers would continue to pay the apprentice while in technical training and may be able to apply for grants to cover the wages lost.

### **Part - Time Training**

An altered delivery option that offers fewer weekly hours than full-time studies, therefore extending the length of the level. Part-time study may occur during daytime, evenings, or weekends.

### **Gap-Week**

A transitional week to cover material apprentices may have otherwise missed when moving to an updated version of curriculum.

## What is the attendance policy?

---

- Promptness and regular attendance are expected from all apprentices attending technical training to ensure success. Following an extended absence, the Nova Scotia Apprenticeship Agency and the training provider reserves the right to communicate absenteeism by the apprentice to employers, Service Canada, or third-party partners.
- Late arrivals or early departures of more than thirty minutes will be considered a ½-day absence.
- Apprentices must attend 90% of the total technical training days per level. If an apprentice misses more than 10%, the instructor will contact the apprentice's Industry Training Consultant who will discuss the next steps with the apprentice. This could result in being dismissed from the training.

## How do I apply for technical training?

---

**PLEASE NOTE: Enrollment in Technical Training is available for up to 30 days prior to the start of training. There will be no admissions after that date.**

- Make sure you are a registered apprentice. For more information on how to register as an apprentice, [click here](#).
- Complete and submit the [Technical Training Enrolment Form](#):
  - a. Prior to applying for training, you must have your employer's approval to attend the training and make sure your hours are updated with your industry training consultant.
  - b. Submission of the form does not guarantee you a seat in training. If your application is approved, you will receive emailed confirmation that you are scheduled to attend the training, provided your information in our system is up to date.

## Can I take two levels of training in one training year?

---

The Nova Scotia Apprenticeship Agency periodically updates our training based on input from industry and our Atlantic harmonization efforts. We recommend that before you enroll in two levels of training in one year, you contact your Industry Training Consultant to ensure that you do not repeat any material or experience training gaps.

If you don't know which training you should register for, please [contact the Agency](#).

# Atlantic Trades Business Seal (ATBS)

---

# Farm Technician

---

- Extended Learning with the Faculty of Agriculture at Dalhousie University is the proud training provider for the Nova Scotia Apprenticeship Agency. The Farm Technician Refresher Training program (online study Guide) is just the start to help prepare candidates to challenge the certification exam for the Farm Technician trade.
- This online study guide provides training resources to prepare candidates to challenge the NS Farm Technician trade qualifier exam to become certified in the trade. This program is a five-week online, self-directed, self-paced refresher program. Learners will have the ability to select which areas they require more focus and attention. The resources were developed based on the competencies identified in the Occupational Standard. It is recommended that participants also review the Standard in preparation for the exam. Throughout this program there will be reading material, videos, activities, and assessments that meet the competencies as outlined in the Occupational Standard for Farm Technician. This course is equivalent to 90 hours.
